

CORROSION PROTECTED CONDENSERS

EXTRA PROTECTION ON NISSENS' CONDENSERS

A selection of Nissens' condensers for specific car models are corrosion protected. The condensers are corrosion protected for the following reasons:

- **Improvement of the original protection and durability**
- **Solid protection against the normal corrosion process**
- **Considerably prolongment of the condenser's lifespan - confirmed by a series of corrosion and salt tests**

NISSENS' PRODUCT FEATURES

Nissens' Product Features will help clarify special features for the product, which you are looking at in one of Nissens' catalogues. Each product feature has its own symbol which identifies the feature related to the specific product. Look for the symbols in our catalogues - printed, CD and online.

If you have any questions, please contact Customer Service. To learn more about us, visit www.nissens.com.
