

Volkswagen

T5

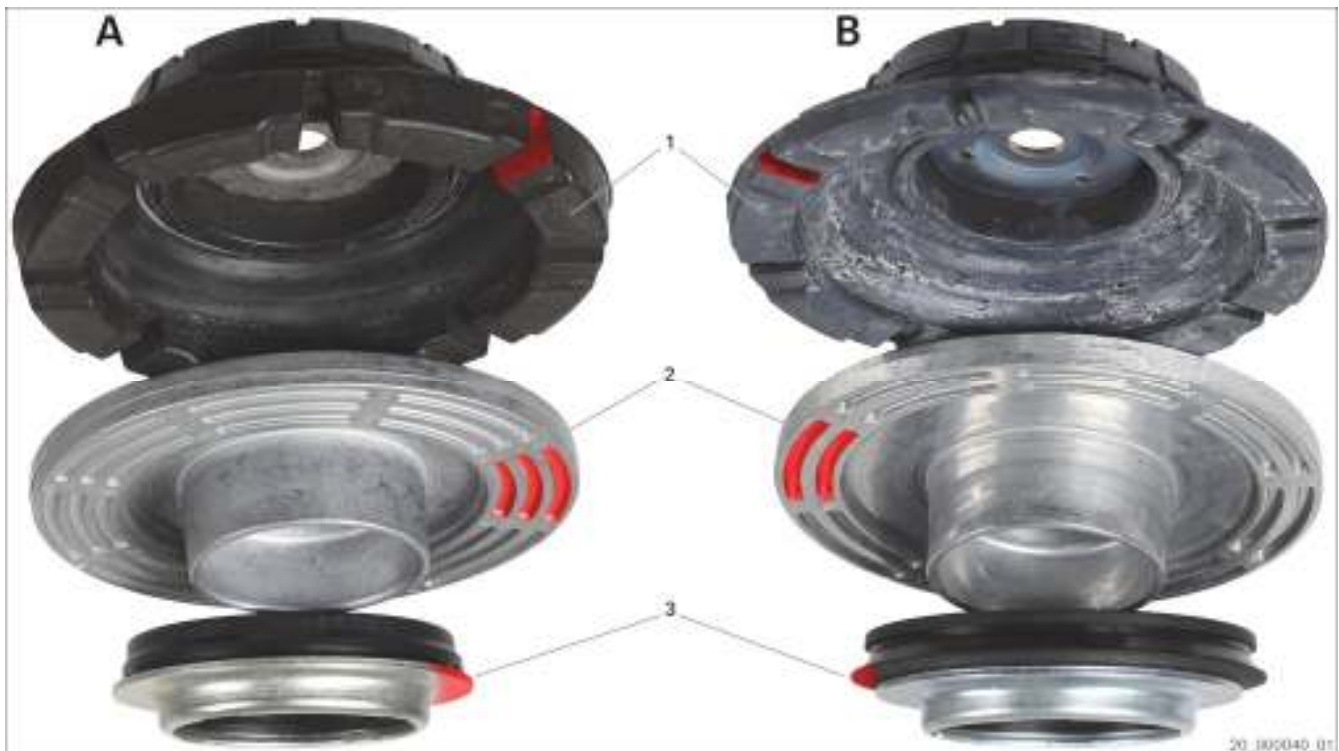

Fig. 1: suspension-strut mount version A/B

- 1 Suspension-strut mount
- 2 Spring plate
- 3 Ball bearings

In the Volkswagen T5, one of the two versions can be installed ex works: A or B (Fig. 1).

- During disassembly, check which version is installed in the vehicle (Fig. 1: red markings).
- Check disassembled spring plates (2) for damage. If the spring plate (2) is damaged in the case of Version A, the component must be converted to Version B. During conversion, all parts (1, 2, 3) have to be replaced, since the spring plate of Version A can no longer be obtained from the vehicle manufacturer.
- Availability of the spare parts

Pos.	Name	Vehicle manufacturer		ZF Aftermarket	
		A	B	A	B
1	Suspension-strut mount		•	•	•
2	Spring plate		•		•
3	Ball bearings		•	•	•

Tab. 1: availability of the spare parts

According to the vehicle manufacturer, it is possible to convert Version A to Version B. The parts of Version A may **not** be combined with those of Version B! ZF Aftermarket recommends that all parts of a version always be replaced in pairs for each axle. Observe the vehicle manufacturer's specifications.

During assembly, observe the correct order
