Fig. 3

Procedure

Remove the steering wheel and the linings according to the manufacturer's instructions to gain access to the steering column. Ensure that the steering wheel lock is unlocked and that the height adjustment is locked. Then remove the steering column according to the manufacturer's instructions.

1. Remove the upper circlip from the steering column with a suitable tool (fig. 1)
2. Remove the four fixing screws on the outer barrel (fig. 2 and fig. 3)
3. Carefully remove the outer barrel from the steering column without tilting it (fig. 4)

Installation

Installation is carried out in reverse order. Tighten the four fixing screws with a torque of 20 Nm!
