### Flywheel OE no.:

90536140 / 616169  
93186460 / 5616016

In the models listed, the clutch can sometimes grab. The problem mainly occurs after long standing times and in ambient temperatures below 10°C.

From May 2007, the vehicle manufacturer has therefore installed a modified clutch and flywheel as standard. As a result, the flywheel depth changed from 19 to 21.6 mm.

For production engine number change points refer to Schaeffler-Aftermarket.com and TecDoc.

**Image 1:** OE no. 90536140 / 616169 without indentation around the circumference, flywheel depth 19 mm

**Image 2:** OE no. 93186460 / 5616016 with indentation around the circumference, flywheel depth 21.6 mm

Vehicles produced before May 2007, that exhibited the same fault were also retrofitted with these parts at the workshop; this is indicated by a green dot on the gearbox (see Image 3).

The different characteristics of the flywheels are illustrated in Images 1 and 2.

The following clutch sets must be used with the different flywheels:
